Mains Pressure

Suitable for Mains  
Pressure.

Flawless Finish

Advanced plating provides a durable surface with a long  
lasting finish

	Smooth Flow	Aerator reduces scaling while delivering a smooth even flow
	Chrome Plate	A base of copper is first applied followed by a layer of nickel and then finally a hard gloss coating of chromium to achieve a shiny hard wearing finish.
	Electroplated: Gun Metal	Electrical current is used to dissolve components into Lacquer that then adhere to the surface.
	Electroplated: Black	Electrical current is used to dissolve components into Lacquer that then adhere to the surface.

Crisp clean lines coupled with gentle refined curves offering a geometric design without the harsh edges.
