

- 1** Check the pan is installed within the dimensions shown below. Mark out the cistern mounting holes.

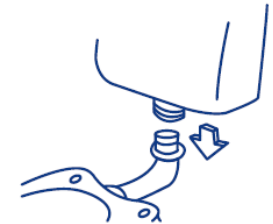

- 2** Screw the mounting bracket to the wall using the screws provided. Ensure it is level.

- 3** Cut the flush pipe to the dimensions shown and fit the pan connector. Fold over boot.

- 4** Lower the cistern on to the mounting bracket and flush pipe.

- 5** Tighten the nut.

- 6** Flush water before connection to inlet valve.

- 7** Fit the water supply line to the inlet valve. Use approved fitting.

- 8** Turn on the water. Operate the cistern and check for leaks.

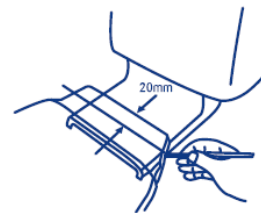

- 9** Check the water level and if necessary adjust the inlet valve.

- 10** Loosen the nut and slide the link into place.

- 11** Position the seat and mark the link as shown.

- 12** Remove the link and cut off the excess if required.

- 13** Install the seat clamp plate and seat bolts. Do not tighten.

- 14** Fit the link and tighten the nut. Slide the seat over the seat clamp and link.

- 15** Ensure seat and link are straight. Tighten the seat bolts.

- 16** Fit the lid to the cistern.
