

EE101 EVERGLADE BOWL & DRAINER

The EE Series is the newest addition to the Mercer stainless steel bowl and drainer family.

The EE101 is reversible and has an easy clean, unobstusive laser edge. It also comes standard with a 90mm round basket waste and overflow.

Combining modern tight radius bowls inset into the clean lines of the drainer, the Everglade series provides the benefits of the traditional drainer and a modern design.
